

UNIVERSITÀ DEGLI STUDI DI PADOVA

Interdepartmental Centre for Space Sciences and
Activities (CISAS, http://cisas.unipd.it/Home_e.php)

Via Venezia 15, 35131, Padua - Italy

Ugo Galvanetto

Professor of Aircraft Structures

THREE SCHOLARSHIPS FOR PHD ON ADVANCED COMPOSITE MATERIALS FOR STRUCTURAL APPLICATIONS

Three scholarships for PhD on *advanced composite materials* for structural applications are available at the *Doctoral School in aerospace sciences and technologies* of the **University of Padua** (Italy) under the supervision of Professor Ugo Galvanetto.

The ideal candidate will have a degree in engineering, physics or mathematics or in any other discipline providing an equivalent preparation. The work of all three projects will involve computations and therefore candidates with an inclination for computational mechanics will be preferred. However experimental activities are also foreseen in order to validate the numerical models.

Professor Galvanetto has recently returned to Italy from **Imperial College London** and is still actively collaborating with many colleagues in different countries; therefore the candidates should be prepared to undertake research activities in different European countries, according to their inclinations and the relevant costs.

Interested candidates should contact Prof. Galvanetto (ugo.galvanetto@unipd.it) for all technical questions and should send to him their cv.

Administrative questions should be addressed to Ms. Luciana Cecchinato luciana.cecchinato@unipd.it.

Further information about CISAS can be found at the web page http://cisas.unipd.it/Home_e.php of the University of Padua.

Padua 3rd August 2010.
